

TOP 10 FEATURES OF DIAMS IQ

DIAMS iQ, Dennemeyer's Intellectual Property Management Software, was developed to support all your IP management needs. Here is a highlight of its top 10 features.

1 User-specific section

Patents, trademarks, designs and more are displayed, in a user-defined order, as a detailed list that supports filters and configurable layouts.

2 Asset modules

A comprehensive document management system (DMS) is available within each module, allowing the attachment of relevant data in any format type regardless of file size.

3 Stand-alone modules

Keep all relevant data in one place by linking independent entities such as companies and contacts to your main assets.

4 Search function

DIAMS iQ is capable of performing searches in multiple ways, from a quick method involving predefined criteria to an easy-to-use configurable search.

5 Reports

Detailed reports can be configured and generated instantly or scheduled to be sent automatically to a list of recipients on specific dates, at defined times.

6 Transfer of payment instructions

Instructing our Annuities or Renewals departments to pay a particular fee is as simple as clicking a button.

7 Mail merge designer

DIAMS iQ can use information such as application, grant or registration date, email or phone number, among others, to query the database and automatically populate Outlook or MS Word templates.

8 Country viewer

This feature provides up-to-date information on trademark, patent and design conventions applicable in jurisdictions around the world. It also supports a section for country-specific remarks and notes.

9 Country law updates

Dennemeyer has a dedicated department that releases quarterly updates on the most recent country law changes.

10 Audit log

DIAMS iQ features an integrated Audit Log tool that is capable of providing details such as username, type of action, asset record ID, the object that was changed and more.
