

UNITARY PATENTS & UNIFIED PATENT COURT

With the introduction of the Unitary Patent system and associated Unified Patent Court (UPC), the topography of patents in Europe is about to see its most significant change in decades.

Our IP Management Software is all set to assist you during the preparation of your portfolio, the creation of Unitary Patent records and allows you to file opt-out requests directly from within the Software.

Our UPC related features will be activated on your DIAMS system as soon as the sunrise period starts.

Smart UP record creation wizards

- ✓ Patent **creation wizard** letting you create National and Unitary Patent (UP) records for your European Patent Convention applications at once.
- ✓ Automatic EPC patent family **monitoring**, alerting you when contradictory UP and National records are present or created.
- ✓ **Country viewer**, letting you view the current status of the ratification of the UP legislation per member state.

Opt-out directly from within DIAMS

- ✓ Opt-out your patents from the UPC register in a click of a button and profit of DIAMS' **automatic validity check** ensuring that your request and the respective required documents are correctly submitted.
- ✓ **Automatic docketing** of events related to the opt-out submission to the Unitary Patent Court.
- ✓ **Fetch your patent's UP status** from the UPC register and withdraw opt-out decisions in just a click.
