

The Dennemeyer IP Group offers high-quality services for the protection and management of Intellectual Property rights and is committed to being the first-choice partner for customers globally.

In addition to a full spectrum of IP-related legal services, Dennemeyer offers IP strategy consulting, comprehensive IP management software, IP maintenance services and cutting-edge patent search and analytics tools.

IP Law Firm services

Global provider of IP protection

Filing for IP rights is just the start. In addition to being maintained, IP assets need to be defended in order to function well on an international scale.

IP Maintenance services

Streamline your processes and ensure payments

The best in Intellectual Property expertise from a global full-service provider. Have your IP assets analyzed and find out how our services can help.

IP Management software DIAMS

Flexible software ideal for today's IP management

Take control of your IP portfolio like never before with Dennemeyer's DIAMS software solutions. Perfect for law firms, corporations and organizations of any size.

Patent Analysis software Octimine

The efficient software solution for modern patent analysis

The AI-powered Octimine Search and Analytics app produces extremely fast and detailed patent insights based on deep learning technology.

IP Consulting

Future-proof your business

Choose a partner with extensive IP, industry and business knowledge that fosters your IP excellence.
