

IP Recordals

Dennemeyer & Associates developed a reliable and easy procedure to undertake IP recordals with the utmost diligence. If you have already outsourced your other administrative services to Dennemeyer, then IP Recordals is just an instruction away.

Safe, reliable and cost transparent

Employing Dennemeyer's Recordals service relieves you from dealing with administrative tasks and offers precise cost estimates. As one of our most successful services, IP Recordals comes into play for change in ownership, change of name or address, entry of license agreements, availability of license and mortgages. It also leverages our worldwide representation through an established network of local representatives.

Using our IP Recordals service helps you minimize risks and reduce administrative costs associated with complex documentation and legal procedures across international jurisdictions. If you want to be on the safe side and reduce your costs in the process of assignment work, the legal experts of Dennemeyer & Associates are here to help.

Flexible and efficient

- Transparent pricing and cost efficiency

Managing your IP records is a four step process

1 Quote preparation

We collect all necessary recordal information and prepare a quotation, based on your needs and requirements.

2 Data collection and preparation

Our experts prepare all required documents such as powers of attorney and standard forms for assignments. Legalization and translation services are available through our global network of agents. Denmemeyer and Associates' team of attorneys can draft assignment agreements or declarations on your behalf, if requested.

3 Communication with agents

Required documents are then submitted to the local agents and the corresponding PTOs (Patent and Trademark Offices).

4 Dispatching official records

Finally, after the assignment is complete and the official certificate is received, we will forward it along with the final report of the recordal project. Invoices, including official and service fees, are issued and sent either electronically or via hard copy.

Benefits of Denmemeyer IP Records
